LETS DIVE IN....

STEP 01 : Create your Character reference

Create a Character Turnaround Sheet:
Tool Used: Google Nano Banana 2 (via Freepik)

Instructions:

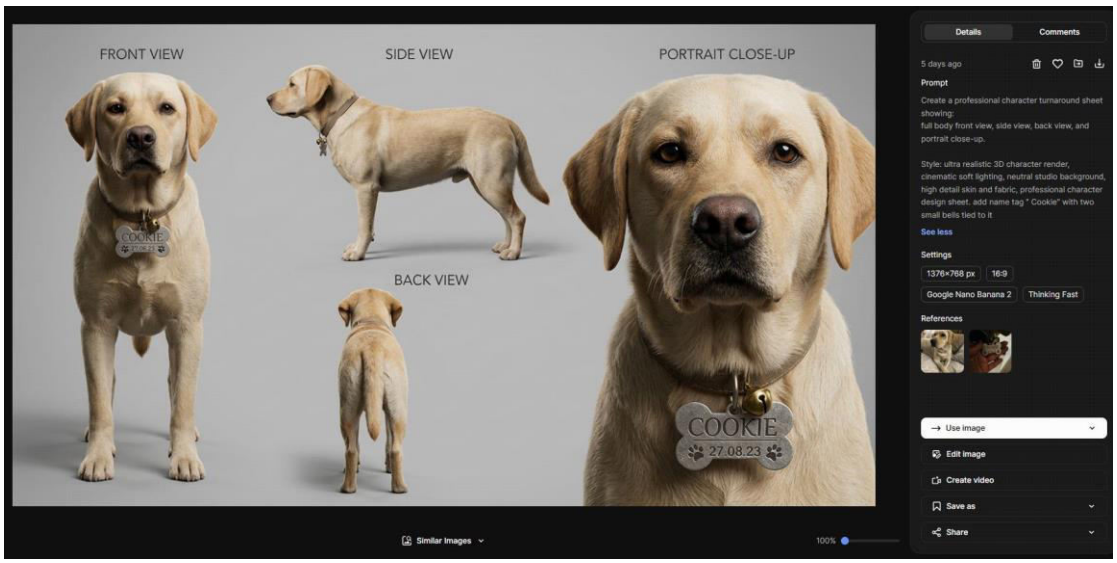
1. Upload your subject (pet / yourself)

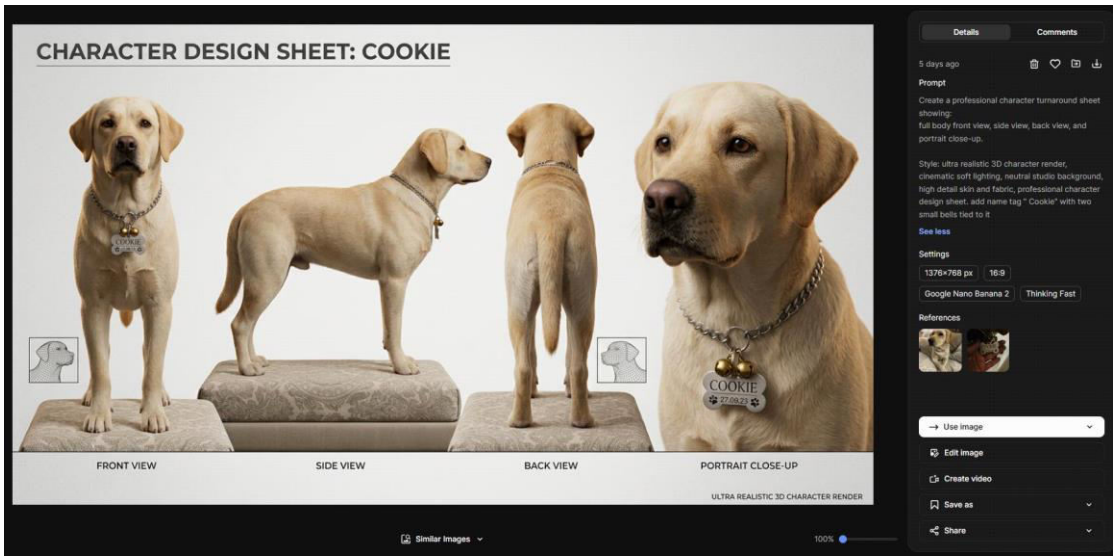
2. Add custom details (e.g., name tag "Cookie")

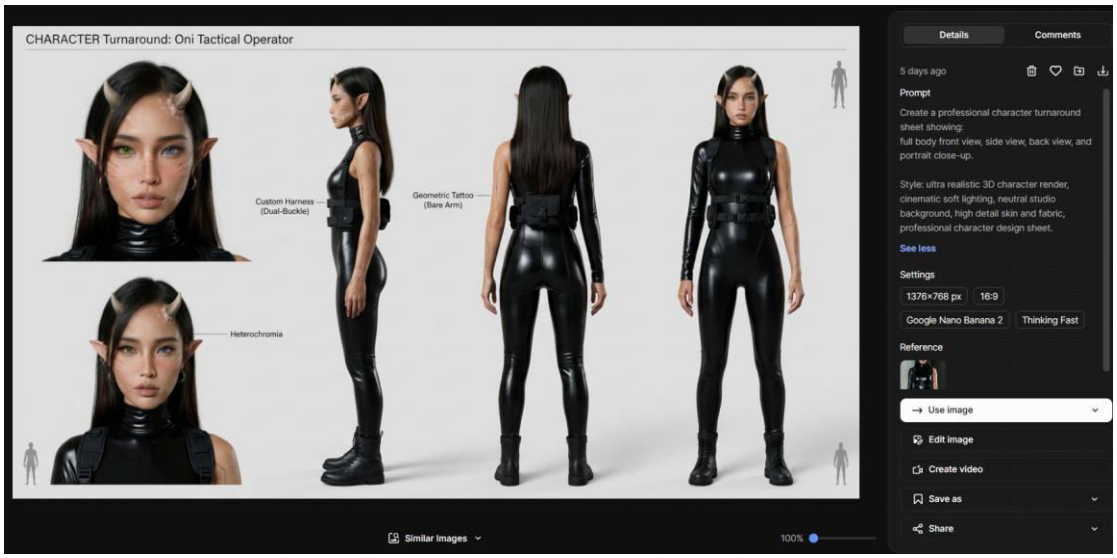
Ref image :

Prompt: *Create a professional character turnaround sheet showing: full body front view, side view, back view, and portrait close-up.*

Style: ultra realistic 3D character render, cinematic soft lighting, neutral studio background, high detail skin and fabric, professional character design sheet. Add name tag " Cookie" with two small bells tied to it







NOW FOR THE FUN PART !

STEP 02 : Create the Video 🎬

Tool: Dreamina AI 🔗 **https://dreamina.capcut.com**

Model: Dreamina Seedance 2

Settings: Omni Reference , 15 sec

Upload:

- Image 1 → Pet character sheet
- Image 2 → Your character sheet

NOTE: Seedance 2.0 is the industry's leading, state-of-the-art video model with a more flexible multimodal workflow.Now available on both WEB & APP.

Heads up: Its currently rolling out in select regions so stay tuned for updates from @dreamina_ai

PROMPT: Paste from below

Image 1 : Your Pet / Cookie

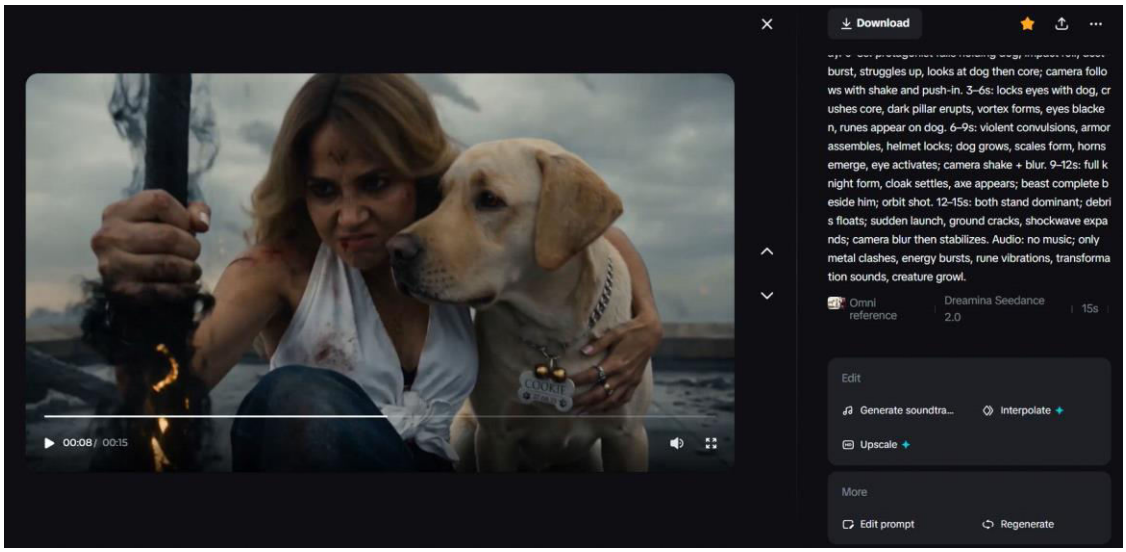
Image 2 : Self (you can use single image or character sheet. I would recommend character sheet as it gives more control over consistency from every angle)

LETS GET INTO ACTION !

MAIN PROMPT (CINEMATIC TRANSFORMATION)

☞ *(Tip: You can tweak this using ChatGPT/ CLAUDE for your own style)*

Main Prompt ***:*** *Realistic sci-fi tokusatsu; ruin collapse; dark energy convergence; heavily armored dark knight and evolved beast undergoing synchronized transformation; cinematic weight, oppressive atmosphere; CG realism blending biotechnology with dark heavy armor aesthetics.* ***Character Image2 (Add your character sheet image)*** *: strict 1:1 replication of face, no beautification; visible bruises, dirt, slight blood at lips. Expression exhausted and suppressed; during transformation extreme pain, clenched teeth, furrowed brows, veins bulging, body convulsing; after transformation cold, controlled, dominant. Clothing: based on , heavily damaged with tears, burn marks, dust, dirt; silhouette unchanged.* ***Creature Image1 (Add your pet character sheet image)*** *: small dog , handheld size, slightly dirty fur, expressive loyal eyes, alert but dependent; stays close in protagonist's arms, protected. Knight Form: full dark iron heavy armor, deep black metallic finish, cold reflections; spiked shoulders, engraved runes; enclosed crown-like helmet with three forward spikes, sealed faceplate, narrow visor; heavy charcoal cloak to calves; right hand holds massive rune battle axe with dim gold glow; left arm muscular, veins visible; posture dominant. Beast Form (from dog): evolves into massive four-legged creature combining wolf, lion, reptile traits; explosive musculature; layered dark gray scales with silver edges; thick curved horns; single forehead eye (gray sclera, black pupil); dark iron armor plates, spiked chest; powerful limbs, black hooked claws; slightly open mouth, pale fangs; stands beside knight in loyal guardian stance. Core Prop: Sacred Ring Crystal Core in right hand, black base with flowing dark-gold energy. Environment: post-apocalyptic rooftop, ruined city, gray-blue sky, meteors streaking with fire trails, wind blowing dust; ground scattered with dark-gold rune fragments. Lighting: IMAX film look, Panavision C-series 35mm lens f/4; low saturation gray-blue and dark gold palette; deep shadows with detail; soft edge focus, natural grain. Effects: dark energy vortex with gold rune particles; both engulfed simultaneously; armor forms with painful piercing sensation; metal clamping sounds; axe materializes; dog transformation stepwise: growth, muscle expansion, scales, horns, third eye; energy pulses synced to pain; no divine tone, purely oppressive bond-driven energy. Camera: single continuous handheld take with subtle breathing motion; path: aerial fall → impact shake → push-in → orbit transformation → low-angle dual frame → aerial pull-away. 0–3s: protagonist falls holding dog, impact roll, dust burst, struggles up, looks at dog then core; camera follows with shake and push-in. 3–6s: locks eyes with dog, crushes core, dark pillar erupts, vortex forms, eyes blacken, runes appear on dog. 6–9s: violent convulsions, armor assembles, helmet locks; dog grows, scales form, horns emerge, eye activates; camera shake + blur. 9–12s: full knight form, cloak settles, axe appears; beast complete beside him; orbit shot. 12–15s: both stand dominant; debris floats; sudden launch, ground cracks, shockwave expands; camera blur then stabilizes. Audio: no music; only metal clashes, energy bursts, rune vibrations, transformation sounds, creature growl.*



⚠️ **NOTES :**

1. Customize prompt based on your character
2. Use character sheets for better consistency
3. Experiment with camera styles

BOOM....Have Fun!!
